

## Eliminate Mistakes and Reduce Time-Consuming Processes by Connecting iSolved to your Company's 401(k) Provider

Retirement savings plans are a great benefit for employees, but shouldn't come with significant administrative burdens for employers. A lack of integration with your 401(k) provider leads to manual processes that are both error-prone and time consuming. With retirement plan administration being highly regulated, mistakes put employers at risk of non-compliance.

**Automating this process through iSolved with our preferred iSolved Marketplace vendor, EverythingBenefits, allows payroll data such as deferrals/contributions and employee demographics to 401(k), directly to providers.** The process has never been easier. All necessary data is automatically sent and delivered to 401(k) providers every pay period. Payments and fiduciary responsibility can still be maintained by the same parties who currently maintain it.

This **simplified, hands-off process** means that files are automatically and securely transmitted in the format required by the 401(k) provider, which helps the administrator save time, increase productivity and reduce risks.

**EverythingBenefits is the iSolved Marketplace Preferred Vendor. Other benefit data feeds are available, including:**

Medical

Vision

Life Insurance

Dental

Short/Long Term Disability

HSA/FSA Enrollments/Changes/Terminations

Other Supplemental Coverage

**EverythingBenefits is available to all iSolved customers. Contact your iSolved expert for more info, or visit [www.isolvedmarketplace.com](http://www.isolvedmarketplace.com) to learn more!**
